12

month indwell

Patient-Centered Design

- Constructed with soft silicone material
- Clinically proven for greater patient comfort over leading competitor¹
- Greater resistance to encrustation than alternative materials²

Physician-Preferred Placement

- Hydrophilic coating facilitates advancement up the ureter
- Tapered tip to facilitate ease of access
- Graduation markings allow for monitoring of stent advancement

Long-Term Implantation

- Approved for indwell up to 12 months
- Biodurable construction for prolonged ureteral placement
- Shape memory loop to reduce risk of migration

IMAJIN® SILICONE HYDROCOATED DOUBLE LOOP URETERAL STENT KIT BRIEF STATEMENT

Indications: Drainage of the upper urinary tract over fistulas or ureteral obstacles. Healing of the Ureter. Cicatrization stent.

Contraindications: Untreated progressive infection of the upper urinary tract. Any known allergies to the medical device materials. These devices may particularly contain traces of silicone resulting from the manufacturing process. The evaluation of the allergic background of a patient is the healthcare professional's responsibility. Do not attempt stent placement in a patient with suspect ureteral avulsion. Do not use, when, in the judgement of the physician, such a procedure would be contrary to the best interest of the patient.

Warnings and Precautions: Reuse of this single use product may create a potential risk to the user. Reprocessing, cleaning, disinfection and sterilization may compromise product

characteristics which in turn create an additional risk of physical harm to or infection of the patient. Formation of knots in lengthy stents have been reported as adverse events and may require surgical intervention to remove them.

Adverse Events: The following events have been reported although their occurrence greatly depends on patients' medical conditions. Adverse events include but are not limited to: migration or dislodgement, encrustation, infection, fragmentation, flank pain, mucosal irritation or inflammation, mucus secretion, frequency, urgency, dysuria, hematuria, reflux, stone formation, obstruction, erosion and perforation of the renal pelvis, ureter or bladder. Some events may be related to this procedure, amongst which those related to the guidewire: ureteral perforation, or burns when in contact with an electrosurgical equipment.

The risks and benefits of using Imajin® Silicone Hydrocoated Double Loop Ureteral Stent Kits should be considered in patients.

The information provided is not comprehensive with regard to product risks. For a comprehensive listing of indications, contraindications, warnings and precautions refer to the product's Instructions for Use. Alternatively, you may contact a Coloplast representative at 1-800-258-3476 and/or visit the company website at www.coloplast.com.

Complications from the use of this device should be brought to the attention of your Coloplast Representative and your physician.

Caution: Federal (USA) law restricts this device to sale by or on the order of a physician.
